LINEAGE RECORD

 **Bolivian Marimba**
 Dark Fawn, 166500, Bolivian

 **DPA Peruvian Powerplay**
 Light Fawn, 810177, Full Peruvian
 One of the nation's premier herdsires is owned by Acorn Alpaca Ranch!!! DPA Peruvian Powerplay, an extraordinary male, has an elite fleece with deep, bold crimp, excellent density and consistent coverage throughout. His conformation is perfect in every way from strong bones and straight legs to his perfect bite. He is an offspring of Accoyo Timeteo, one of Don Julio's Plantel-Select herdsires. Powerplay offspring won several Championships during 2004. Powerplay's first year at Acorn Alpaca Ranch produced Blue Ribbon winners in both Black and White classes as well as a Fawn Reserve Championship, all during the 2005 spring show season. Don't miss adding these incredible genetics to your breeding program.

Powerplay's Shadow is a very nice bay black male from the Accoyo Timoteo line. He has always brought home a ribbon no matter the show or the competition with every judge commenting on his great fleece characteristics and heavy bone. Shadow is like a good wine, he gets better with age. At his last 5 out of 6 shows he has earned the Blue ribbon in his class even at five years of age. Shadow has a dense but very fine fleece with bold consistent crimp throughout. He has a great head and very stout stance. Shadow has an exceptionally fine fleece

for a Bay Black male, he has the fineness of many white animals. With several cria on the ground now we can say with confidence "He will not disappoint"! We think Shadow would be a good choice for any color from fawn to grey. One of Shadow's first offspring, Shenandoah's Luke, has taken 4 Blue Ribbons in a row! Second son, Gabriel, 3 Blue's in a row!
